

Shapely Compositions

Materials: One piece of drawing paper, crayons, one piece of black cardstock, scissors, white chalk

1. Assign a color to each shape below. You may use the color wheel from the previous assignment for reference.

2. Cover the back of this page where the shapes are with white chalk and place the black cardstock paper underneath. Make sure it does not move while you trace the shapes with pressure. Now that you have an outline of the shapes, you

can cut them out with scissors et voila! You now have stencils which you may use to make your shapely overlap compositions.

3. Using these shapes, you will create an overlapping composition (8.5 X 11) that reflects the combination of these colors. You must use at least 3 shapes but using all the shapes is highly encouraged.

Example: Overlapping a yellow triangle and a red circle make an orange slice.
